

TSUS at PRI and EPARTRADE Online Industry Week!

We are excited about exhibiting at PRI 2021. With the cancellation of 2020 event we are looking forward to touching base with all our motorsports friends. We will be in our usual spot (#135) and hope you will stop by and see us.

In addition to exhibiting at PRI we will be presenting at EPARTRADE's second annual Online Race Industry Week. We don't have the schedule yet but Ray and Naethan will talk about our streamlined CFD process, TS Auto, and pulling mapping data from it to improve on track performance. [Registration is free.](#)

Reach out if you would like to schedule a time to meet with Ray and/or Naethan at PRI in Indy. And keep an eye on our social media where we will send out updates on time and links to the EPARTRADE educational event.

With our unmatched background in motorsports we have a wealth of information to share and want to learn about your current challenges. We help teams at all levels - don't hesitate to reach out to us.

Can't wait to see you at either or both events!
